Make the Sweet Spot Wherever You Sit
Toshiba's plug-and-play Mini 3D Sound Bar offers a simple way to introduce a distinctly better and completely seamless audio experience to HDTVs and other devices that could benefit from an audio boost. Leveraging Sonic Emotion® Absolute 3D technology, this lightweight and compact device fills an entire room with immersive, balanced 3D sound. It utilizes Wave Field Synthesis originally developed for large concert halls to create optimal sound quality for a more spacious and realistic audio experience no matter where in the room the listener is located.

Compact Simplicity and Convenience
The Mini 3D Sound Bar is small, simple to set up, and delivers incredible 3D sound without an array of external speakers. 5.1 and other so called immersive audio systems can be typically expensive, complicated to set up, run wires, position and calibrate.

Broad Device Compatibility
Onboard Bluetooth® lets you easily link with your smartphone or tablet. Plus, an array of digital and analog inputs allow you to enjoy full, rich, extra-realistic sound from a computer, MP3 or Blu-ray Disc™ player, and of course your television.

Optimize Your Experience
The Toshiba Mini 3D Sound Bar with Subwoofer comes with 3 pre-set equalizer settings tuned to enhance your listening experience. If you are watching a TV show or Movie set the sound bar to "Movie" to get the best balance of bass and voice clarity. If you prefer to play a game switch to "Game" mode for intense bass and treble. When it is time to listen to your favorite musician switch to "Music" mode for outstanding voice clarity and balance among all instruments. Whatever you are listening to the Toshiba Mini 3D Sound Bar will upgrade your entertainment experience.

Toshiba's Mini 3D Sound Bar fills the entire room with 3D sound.
